Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The indicated allowability of claim 16 is withdrawn as is the finality of the last office action. Applicant's response submitted 6/20/2006 has been entered.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claim 16 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 16 requires a damper housing having a flange, one side fixed to the hole edge of the through hole and a lid fixed to the other side, and further recites "said resin hole edge covering portion at the chassis member is forming a portion of the vibration preventing damper". The limitation "said resin hole edge covering portion" lacks proper antecedent basis and the feature of a resin portion of the chassis forming a portion of the damper appears to conflict with the recited flange arrangement. Note figure 4a appears to be the only embodiment having a resin portion of the chassis forming a portion of the damper, however the flange structure is not arranged as claimed. Also note that claim 16 recites "a resin portion", "a resin portion of

said chassis member" and "said" resin hole edge covering portion". It is not clear how these separate limitations relate to one another.

Allowable Subject Matter

Claims 6, 15, 23, 27-29, 31 and 33 are allowed.
